

ABDULLAHI OLAIDE IBRAHIM

CAREER OBJECTIVE

Experienced software developer with a strong proficiency in designing and implementing scalable applications using best practices in software development. Dedicated to writing clean, maintainable code and contributing to the success of project teams through collaborative problem-solving. Skilled in data structures, algorithms, and problem-solving to deliver efficient solutions. Effective communicator with a passion for continuous learning and staying updated with industry trends. Detail-oriented, organized and meticulous employee. Works at fast pace to meet tight deadlines. Enthusiastic team player ready to contribute to company success.

PROFESSIONAL EXPERIENCE

Intern, 04/2024 - Current

Univelcity - Lagos, Nigeria

- Developed an expense tracker application using REACT.JS, Node.JS, Mongodb and Express
- Designing and developing user-friendly interfaces for websites and web applications.
- Writing clean, efficient, and well-documented code for both the front-end (client-side) and back-end (server-side) of applications.
- Testing and debugging applications to ensure functionality and performance.
- Working with databases to store and retrieve data needed for applications

Business Application Developer, 01/2021 - 12/2023

Reliance Infosystem Limited - Lagos, Nigeria

- Window server management
- Microsoft Dynamics 365 ERP integration, deployment and implementation
- Power App development, deployment and publishing
- SAP business one client management system
- PowerShell
- Cloud services: Azure management, Azure administrator and security
- Data analysis with excel, power query and power BI
- Introduction to networking
- Cyber security and Advanced Vulnerabilities Threat Management

Business Application Developer Intern, 09/2021 - 10/2022

Reliance Infosystem Limited - Lagos, Nigeria

- Application of JavaScript HTML, React, SharePoint and Power Platform to build website and web application within given time space
- Gained hands-on experience with JavaScript, JQuery, CSS and HTML and tech rudiment studies and implementations
- Azure Administrator
- Development of web and mobile power apps
- Development of SharePoint team and communication sites
- Development of business processes applications
- EDMS deployment
- SAP integration with power platform and other ERP solutions
- Automation of business processes power automate
- Development of document management system
- Managing up-running of the apps built and deployed
- Managing window server 2019

IT Manager/Fellow, 03/2021 - 09/2022

Ojay Consult Limited - Ibadan, Nigeria

- Deployment of CBT Software
- System Networking
- Population of questions onto Dynamic CBT
- Creation of manual for troubleshooting and maintenance
- Monitoring of Back-end of the app

Cloud Computing Trainee, 10/2021 - 03/2022

Careerdemy - Lagos, Nigeria

- We were taught cloud concept and different models
- Deployment on virtual machines, connecting them and making them to ping each other
- Deployment of Microsoft sample of the Azure tenant
- Window server management
- Power Platform (PowerApps, Power Bi and Power automate)

Cloud Computing Trainee, 10/2019 - 03/2021

Andela - Lagos, Nigeria

- We were taught cloud concept and different models
- Deployment on virtual machines and ping each other
- Deployment of flask python application on the Azure tenant
- Configured, maintained, and monitored virtual machines in the cloud environment.
- Created scripts to automate daily tasks related to cloud management.

Android Development Student, 10/2019 - 02/2021

Bootcamp/Wootlab - Abuja, Nigeria

- Applied Java and XML to build Android application within a finite amount of space and time
- Gained hands-on experience with Java, Kotlin, CSS, XML, APIs and tech principles whilst working on team/individual projects, code reviews, and pair programming sessions
- Collaborating with cross-functional teams to define, design, and ship new features for Android applications.
- Keeping up-to-date with the latest trends and best practices in Android development.

Multimedia and Application Manager , 01/2019 - 12/2020

E-dawah Tech Ltd - Ibadan, Nigeria

- Client consultant section team member
- App testing and updating after uploading to Google Playstore
- Managing and monitoring of development and deployment of D-box app
- Uploading audios, videos, and e-books to the Backend of the app
- Development of content to be disseminated on social media
- Uploading of files into the web portal and Scheduling of uploaded files to a particular date
- Conversion of audio recordings into video, translation of Yoruba videos into English and subtitling of video files
- Detecting new ways of studio improvement, and implementation after approval by the management

Team Member , 01/2019 - 12/2019

MEED Network Limited - Nigeria

- Monitoring and tracking server performance
- Entering of data onto excel sheet
- Assessment and collation of documents

EDUCATION

Cyber security Management, 12/2020

Clemads Global Consulting Limited - Abuja, Nigeria

Project Management, 05/2020

Management and Strategy Institute

Bachelor of Science, Chemistry, 10/2018

University of Ilorin - Ilorin, Nigeria

Computer vocational training, 10/2013

FG Digital Youth Center - Ibadan, Nigeria

PROFESSIONAL CERTIFICATIONS

- Fundamental Cyber Security Certification (ICSI)
- Microsoft Azure Fundamental Certification (AZ-900)
- Microsoft Azure Data Fundamental Certification (DP-900)
- Microsoft AI Fundamental Certification (AI-900)
- Advance development Certification (Wootlab)
- SAP Cyber security Virtual Internship
- AWS Certified Cloud Practitioner (CLF-C01) Understudying to completion
- The cognizant USA Agile Methodology Virtual Experience Program (Ongoing)

PROJECTS

Expense tracker app

A mobile application designed to help users keep track of their expenses and manage their finances. Users can input details of their expenses, such as amount spent, category, date, and description, into the app. The app then organizes this data, provides visual representations of spending patterns, generates reports, sets budget limits, and offers insights to help users make informed financial decisions.

- I used React.JS, Node.JS, Mongodb and Express to build it.

Artisan Connect – VS Code Android Studio |

Artisan Connect application allows clients to search and meet Artisans for their services.

- Used Firebase API database.
- Integrated Firebase to login, sign-up, and upload pictures.
- Used Android Studio for development.
- Used Java for initializing the functionalities.
- Used XML for the frontend development.

MediSearch– Android Studio Frontend | Firebase Backend

An Android application for medical merchandise. It has search engine functionality as a Google search.

- Used Firebase API database.
- Integrated Firebase to login, sign-up, and upload pictures.
- Used Android Studio for development.
- Used Java for initializing the functionalities. • Used XML for the frontend development.
- Used Firebase API database.
- Integrated Firebase to login, sign-up, and upload pictures.
- Used Android Studio for development.
- Used Java for initializing the functionalities.
- Used XML for the frontend development.
- Used Firebase for account creation and authentication process.

Catalog Bot – Teams Toolkit- React Framework | React.JS front

A React application built using Teams Toolkit, which can be customized for clients to showcase their product using bot.

- Used React framework to build.
- Use Microsoft Graph API to connect its database.
- Used CSS for styling.
- Manipulated and traversed the DOM using event handlers.

Digital Techspace website

A website which can be customized for clients to showcase their digital products and services.

- Used Firebase API database.
- Integrated Firebase to login, sign-up, and upload pictures.
- Used Android Studio for development.
- Used Java for initializing the functionalities.
- Used XML for the frontend development.
- Used Firebase for the account creation process.
