Professional Summary:

As a full stack developer and an experienced customer service support personnel, I have a proven track record of building robust web applications from the ground up. My expertise spans from front-end to backend technologies and efficient customer/vendor engagements and troubleshooting, as well as preparing and delivering coding training modules.

As a recipient of merit scholarship awards from international corporations like the MTN Group and the African Development Bank (AfDB) at undergraduate level, alongside other numerous individual awards, I possess relevant technical skills and potentials to deliver corporate tech solutions.

My approach is collaborative and agile, working closely with cross-disciplinary teams to align technical development with business goals. I am also committed to continuous learning, regularly updating my skill sets to stay at the forefront of industry advancements.
